Hungry Hearts in Malawi & Tanzania

Traveling to Malawi and Tanzania causes a person to realize the importance of reaching the children, because the average life span is less than 40 years. Evangelism and feeding programs are effectively opening doors to the hungry hearts.

Radio and television provide a means of presenting the gospel to millions. Al and Marilyn Pulis have helped with stations in Malawi and Tanzania. Our group was able to transport new equipment to help with the launching of a new TV station and two additional radio stations.

Haiti Update

James and Rachael Courter, Southern Missouri missionaries, are actively involved in the recovery efforts in Haiti. In the midst of many who have indescribable physical needs, their medical training has proved to be invaluable. They recently shared this update:

"We have been held up in Port au Prince for the last few days and hopefully will be returning home tomorrow.....so glad to report that the daily prayer meetings we had started have not only continued in our absence but have grown in strength and number.....PRAISE BE TO GOD. Thanks for all your prayers!"
